

ATTN: Federally Qualified Health Center (FQHC) and Rural Health Clinic (RHC) Providers

To ensure compliance with KY Medicaid contractual requirements—including **Section 15.4** (Access to Contractor's MIS), **Section 16.1** (Encounter Data Submission), and **Appendix E** (Management Information Systems Requirements)—we are issuing the following clarification. These provisions are essential to safeguard accurate and timely WRAP payments to providers.

Please ensure you do **not** alter the Billing Provider Type on claims.

For WRAP payments to generate correctly within the Medicaid Management Information System (MMIS), the Billing Provider Type must always be reported as either **31- Federally Qualified Health Center (FQHC)** or **35- Rural Health Clinic (RHC)**.

The Rendering Provider field is where the actual dental provider should be listed on the claim. This distinction is critical for:

- Accurate claims processing
- Compliance with state and federal requirements

Thank you for your attention to this matter and for helping us maintain proper claim submission standards.
